Individual Feeding of Sows in Loose Housing Systems

- strongest loose housing feed station on the market
- heavy duty, trouble free, with open top
- more light and visibility through the station ... sows enter easily
- one sided HD roller entrance door ... prevents ear tag losses and double entry
- closed through feeder ... opens only if sows are entitled to feed
- locked one sided exit door ... unlocking and opening only by the exiting sow
- safety doors for easy cleaning, maintenance check or emergency situations
- 2 different diets for both dry or liquid feeding systems
- dosing device available for minerals, de-wormers etc
- selection at each feed station or central selection available
- color markings for feed stations and heat detectors
- ability to select ... and/or paint
- manual controls for all operations at the feed station for ease of use
- heat detector to recognize return sows at an early stage
- hand held terminal for mobile data changes ... uploads to main computer automatically
